

EMPLOYMENT AGREEMENT

GODS OF SPLINTERLANDS

Effective Date:

This Employment Agreement ("Agreement") is entered into between:

Company: Steem Monsters Corp
Registered Address: 24 Veterans SquareMedia, PA 19063-3155United States
Authorized Representative: Dave McCoy
Title: CEO

Hereinafter referred to as the "Company."

And

Employee:
Address:
Position:Technical Lead
Work Location:

Hereinafter referred to as the "Employee."

The Company and Employee may each be referred to as a "Party" and collectively as the "Parties."

---

1. PURPOSE OF THE AGREEMENT

The Company engages the Employee to provide professional services in connection with the development, operation, maintenance, and expansion of the Gods of Splinterlands gaming platform.

The Employee agrees to perform assigned responsibilities in accordance with the Company's technical requirements, product specifications, development roadmap, project priorities, and applicable policies.

The Employee shall perform their duties professionally and cooperate with other members of the development and management teams.

2. PROJECT OVERVIEW AND SCOPE

Gods of Splinterlands is a blockchain-based collectible card battle game combining strategic gameplay, NFT digital ownership, AI-powered character generation, multiplayer battles, competitive tournaments, and a token-based reward ecosystem.

The project aims to establish an engaging gaming platform where players can create and collect unique heroes, enhance their characters, build battle strategies, compete against other players, and participate in organized tournaments.

The Employee's responsibilities shall relate to the development and support of one or more of the following project areas.

2.1 NFT Card & Character System

Development of the collectible hero card ecosystem, including:

- NFT-based character functionality.
- Hero card attributes and metadata.
- Character collection and management.
- Character rarity and classification.
- Card ownership and asset management.
- Integration between game characters and blockchain assets.

2.2 AI-Powered Character Generation

Development and integration of AI-powered character creation capabilities, including:

- AI-generated fantasy character artwork.
- Character customization workflows.
- AI-generated character metadata.
- Character descriptions and attributes.
- Integration of generated characters into the game ecosystem.

2.3 Multiplayer Battle System

Development of online multiplayer gameplay functionality, including:

- Private battle room creation.

- Player invitations and matchmaking.
- Real-time battle synchronization.
- Battle session management.
- Player action validation.
- Battle results and game-state management.

2.4 Hero Enhancement & Item System

Development of game progression and enhancement functionality, including:

- Hero upgrades.
- Equipment and item management.
- Character enhancement mechanics.
- Inventory functionality.
- Item purchasing and usage.
- Character progression and balancing.

2.5 Tournament & Competitive System

Development of competitive gameplay functionality, including:

- Tournament creation and scheduling.
- Player registration.
- Tournament matchmaking.
- Leaderboards and rankings.
- Battle result verification.
- Tournament winner determination.
- Reward distribution.

2.6 Blockchain & Token Ecosystem

Development and integration of blockchain-related functionality, including:

- Ethereum network integration.
- NFT smart contracts.
- Wallet connectivity.
- NFT minting and ownership verification.
- Token smart contracts.
- Blockchain transaction monitoring.
- Daily participation and tournament reward mechanisms.

These areas represent the principal development objectives of the project. The Employee's specific responsibilities shall depend on their assigned position and agreed work scope.

3. TECHNICAL DEVELOPMENT SCOPE

Depending on the Employee's position and assigned responsibilities, the services may include:

- Frontend and user-interface development.
- Responsive web and mobile interface implementation.
- Backend and API development.
- Game engine and battle logic development.
- Multiplayer and real-time communication systems.
- Blockchain and smart-contract development.
- Ethereum and wallet integration.
- NFT minting and metadata management.
- AI image and metadata generation.
- Database architecture and implementation.
- Tournament and reward system development.
- Third-party service integrations.
- Testing and debugging.
- Performance optimization.
- Security-focused development.
- Code review and refactoring.
- Technical documentation.
- Deployment and release support.
- Maintenance and bug fixing.

Specific tasks may be assigned through technical specifications, development tickets, sprint plans, milestones, assigned roles, or written instructions from the Company's designated representatives.

4. TECHNICAL FOUNDATION & ARCHITECTURE

The Employee shall develop and maintain assigned components in accordance with the Company's approved technical architecture and development standards.

The project architecture may include:

- Frontend gaming applications.
- Backend services and APIs.
- Database and data management infrastructure.

- Real-time multiplayer communication.
- AI-powered generation services.
- Ethereum-based blockchain integration.
- NFT and token smart contracts.
- Tournament and reward management systems.
- Game animation and rendering systems.

The Employee shall not materially alter approved core architectural decisions, blockchain implementations, security mechanisms, or data structures without prior approval from the Company's designated technical representative.

5. DEVELOPMENT RESPONSIBILITIES

The Employee agrees to:

1. Perform assigned development work professionally and within agreed timelines.
2. Follow the Company's technical specifications and development standards.
3. Produce maintainable, scalable, and reasonably documented code.
4. Participate in code reviews and technical discussions when requested.
5. Identify and communicate technical risks, blockers, and dependencies.
6. Test assigned functionality before delivery.
7. Correct defects attributable to the Employee's work.
8. Maintain appropriate version-control practices.
9. Protect Company credentials, repositories, documentation, and confidential information.
10. Cooperate with other Employees, designers, technical managers, and project stakeholders.
11. Provide reasonable progress updates regarding assigned responsibilities.
12. Follow applicable security and data protection requirements.

6. DEVELOPMENT PROCESS

The Employee shall work according to the Company's development process, which may include:

- Sprint planning.
- Task assignment.
- Development milestones.
- Code reviews.
- Testing and quality assurance.
- Staging deployments.
- Production releases.

- Technical documentation.
- Progress reporting.

The Company may reasonably modify task priorities as the Gods of Splinterlands development roadmap evolves.

7. COMPENSATION

The Employee's compensation shall be agreed upon by the Parties as follows:

Annual Salary: USD $180,000 ~ 200,000 per year.

Payment Frequency: Monthly.

Payment Method:80% of Bank Transfer & 20% of Crypto Payment.

Payment Schedule: According to the Company's standard payroll schedule and applicable employment laws.

Any bonuses, benefits, equity, token allocations, or additional compensation shall be documented separately in writing.

All applicable payroll taxes, social security contributions, withholding obligations, and statutory benefits shall be handled in accordance with the applicable employment laws.

8. EMPLOYMENT STATUS

The Employee is engaged as an employee of the Company and not as an independent contractor, partner, agent, or joint venturer.

The Parties intend to establish an employment relationship, subject to applicable law.

The Company and Employee shall comply with the employment, payroll, tax, social security, and other statutory obligations applicable to the employment relationship.

9. INTELLECTUAL PROPERTY OWNERSHIP

To the maximum extent permitted by applicable law, all intellectual property and work product created, developed, designed, or contributed by the Employee within the scope of their employment or specifically assigned Company projects shall belong to the Company.

This includes, without limitation:

- Source code and software.
- Game mechanics and battle logic.
- NFT character designs and artwork.
- AI generation workflows and related materials.
- Smart contracts.
- Blockchain integrations.
- Technical architecture.
- Database structures.
- APIs and backend services.
- Game interfaces and visual assets.
- Documentation and technical specifications.
- Scripts, configurations, and development tools.
- Other project-related materials and deliverables.

The Employee agrees to execute reasonable documents and take reasonable actions necessary to confirm, register, or transfer such intellectual property rights to the Company, to the extent legally permitted.

Pre-existing intellectual property owned by the Employee before employment shall remain the Employee's property unless expressly assigned through a separate written agreement.

Third-party software, open-source software, libraries, and components shall remain subject to their applicable licenses.

The Employee shall not knowingly incorporate third-party materials into Company deliverables in violation of applicable intellectual property rights or license requirements.

10. CONFIDENTIALITY

The Employee shall maintain the confidentiality of all non-public information relating to the Company and Gods of Splinterlands.

Confidential information includes, but is not limited to:

- Source code and repositories.
- Game mechanics and internal development logic.
- NFT character designs and metadata.
- AI generation technology and workflows.
- Blockchain architecture and smart contracts.
- Tokenomics and reward mechanisms.

- Database structures and APIs.
- Business plans and development roadmaps.
- Technical specifications.
- Financial and commercial information.
- Investor and partnership information.
- Security information and credentials.
- User and player information.
- Unreleased features and product designs.

The Employee shall not disclose, reproduce, distribute, or use confidential information except as necessary to perform assigned responsibilities.

These obligations shall be subject to applicable legal rights and protected disclosures.

The Parties may execute a separate Non-Disclosure Agreement, which shall supplement this Agreement.

11. DELIVERY AND ACCEPTANCE

All project deliverables shall be submitted through the Company's designated development environment, repository, project-management system, or another approved method.

The Company may review submitted work to determine whether it complies with the agreed technical specifications and project requirements.

If a deliverable materially fails to meet agreed requirements, the Employee shall reasonably cooperate in correcting identified defects attributable to their work.

12. PROJECT CHANGES

The Company may update or reprioritize development requirements based on:

- Technical findings.
- Product requirements.
- Gameplay improvements.
- User feedback.
- Security considerations.
- Blockchain developments.
- AI technology developments.
- Changes to the project roadmap.

Material changes to the Employee's overall employment responsibilities or compensation shall be documented and agreed upon by the Parties where required.

13. TERM

This Agreement shall commence on the Effective Date or the separately agreed employment Start Date.

Employment Start Date:

Initial Employment Term:

Any fixed-term renewal or extension shall be documented in writing and comply with applicable employment law.

14. TERMINATION

Either Party may terminate this Agreement in accordance with applicable employment law and the agreed notice requirements.

Notice Period:

The Company may terminate employment for lawful reasons and through the procedures required by applicable law.

Upon termination, the Employee shall:

1. Return Company equipment and property.
2. Transfer assigned source code and project deliverables.
3. Return Company credentials and access materials.
4. Provide reasonable handover documentation.
5. Delete or return confidential Company information as legally required.
6. Cooperate with reasonable transition arrangements.

The Company shall pay salary and other amounts properly due through the effective termination date, together with any statutory termination entitlements required by applicable law.

15. REPRESENTATIONS & OBLIGATIONS

The Employee represents that:

- The Employee has the legal capacity to enter into this Agreement.
- The Employee's performance will not knowingly violate another party's contractual obligations.
- The Employee will perform assigned responsibilities professionally and in good faith.
- The Employee will comply with applicable laws and regulations.
- The Employee will respect intellectual property rights.
- The Employee will protect Company confidential information.
- The Employee will not knowingly introduce malicious code or unauthorized access mechanisms into Company systems.

16. GOVERNING LAW & DISPUTE RESOLUTION

Governing Law:

Place of Employment:

This Agreement shall be interpreted subject to the mandatory employment laws and regulations applicable to the employment relationship.

The Parties shall attempt to resolve disputes through good-faith discussions.

Nothing in this Agreement shall exclude mandatory employee protections or statutory rights under applicable law.

17. GENERAL PROVISIONS

- Any amendment to this Agreement must be made in writing and agreed upon by the Parties.
- If any provision is found unenforceable, the remaining provisions shall continue to apply to the extent permitted by law.
- This Agreement represents the understanding of the Parties concerning the employment relationship, subject to any applicable statutory requirements.
- Electronic signatures may be used where legally valid.

18. SIGNATURES

By signing below, the Parties acknowledge that they have read, understood, and agreed to the terms of this Agreement.
